1 Some Mindless Experiments in Python

```
[17]: print("Hello World!")
```

Hello World!

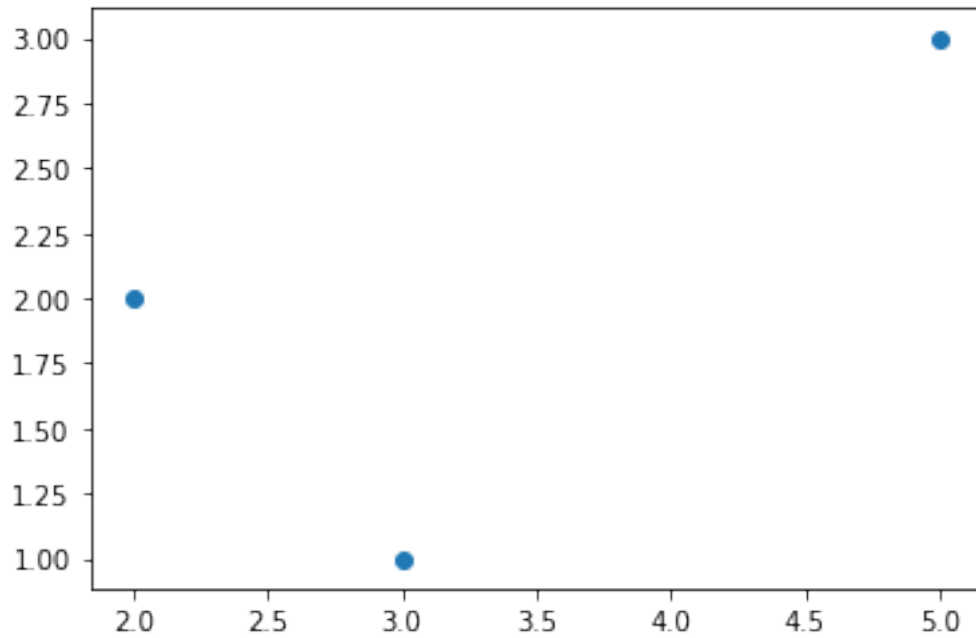

```
[18]: s=3  
      t=4  
      s*t
```

```
[18]: 12
```

```
[19]: import numpy  
      import pandas  
      %matplotlib inline  
      import matplotlib.pyplot as plt
```

```
[20]: plt.scatter([3,2,5], [1,2,3])
```

```
[20]: <matplotlib.collections.PathCollection at 0x28753e00c48>
```

2 A Second Heaing

```
[21]: print("Seems easy enough...")
```

Seems easy enough...

2.1 A Subheading

A call back...

```
[22]: s+t+t+t
```

```
